Small photovoltaic solar lights

Overview

What are the best outdoor solar lights?

For an affordable lighting option that adds ambiance to your outdoor space, we recommend the 33-foot-long Brightown Outdoor Solar string lights. Available in seven colors (we tested white), these fairy lights survived all of our durability tests and were easy to install, with only two stakes needed for the solar panels.

Are brightech solar powered outdoor string lights any good?

If you're looking for a set of string lights, testers loved the Brightech Ambience Pro Solar Powered Outdoor String Lights, because they held up to water and freezing temperatures. And, while the bulbs are made of plastic, testers said they were clear and didn't look inexpensive.

Are solar-powered outdoor lights a good idea?

Using solar-powered outdoor lights can set that glowing backyard ambiance in a more sustainable way, and eliminates the need for long, ugly cords or constant battery replacement. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

Are solar lights a good option for outdoor space?

One great way to illuminate your outdoor space is with solar lights. "Solar lights, compared to low voltage and line voltage outdoor lights, are safer and more DIY-friendly since there's little to no wiring required at all," says Sarah Jameson, marketing director of Green Building Elements.

How do I choose a solar light?

Many solar lights have special features like on/off switches, timers, or motion sensors. Some solar lights, like the Brightown Outdoor Solar String Lights, even have different light settings like a slow fade or twinkle. Before purchasing a solar light, ask yourself exactly what you need so you can find a

solar light that best suits your needs.

What are the different types of outdoor solar lights?

Outdoor solar lights fall into three general types based on their light output: motion-activated, dusk-to-dawn, and timer-controlled. Because of solar cell size and battery capacity, the gathered solar energy is a limited resource, so consider when you want the lights to shine and for how long.
