Small solar power generation business

Overview

Billions of dollars of solar PV, solar thermal systems, solar attic fans, solar cooling systems, etc., are sold each year, not to mention all the parts that are required to build and operate such installations. In addition to that, solar lights, solar gadgets, solar rechargers, and a growing list of related products. Clearly, you have a.

If you can't go into the manufacturing of solar panels, then one of your best bets when it comes to starting a solar energy-related business is to engage in the sales and distribution of solar.

Another service that is growing in demand is conducting solar energy audits. Basically, in this profession, you will have to make recommendations on how people can reduce their electrical consumption. This is a highly knowledge.

This is actually an aftermarket service-based business. After the installation of the solar project, it demands regular maintenance, check, and.
