

European Solar and Energy Storage Solutions

Socomec modulys Guernsey

Overview

How much power can a modulys GP provide?

The installed power can be increased up to 200 kW by adding hot-swap plug-in power modules for incremental steps of 25 kW. Designed with no single point of failure, the MODULYS GP offers all the advantages of the Green Power 2.0 technology. Fully redundant architecture for maximum availability, minimum MTTR and risk free maintenance.

Why should you choose modulars GP?

- Company declaration of 20-year compatibility. With its flexible modularity providing seamless and risk-free power scalability up to 600 kW, the MODULYS GP range is the ideal solution for unscheduled site upgrades or incremental power evolutions.

What is modulys RM GP?

Contact our technical support. MODULYS RM GP is a 3-phase modular UPS system designed for 19" rack integration. Easy to integrate and install whilst simple to manage and maintain, it provides maximum availability and power protection in a compact design leaving free space for other rack-mounted devices.

What does socomec do?

SOCOMECE's vast expertise and technological know-how in modular UPS solutions have enabled it to develop a new modular, three-phase UPS that employs the latest cutting-edge technology combined in a unique design and architecture. Our dedicated Expert Services for UPS We offer services to ensure your UPS highest availability: >Commissioning.

What is connections modulars GP?

Connections MODULYS GP offers modular solutions to meet all your requirements for back-up times (whether a few minutes or several hours)

without compromising flexibility and scalability. Catalogue 2022 7.
