Renewable energy sources seem to be a good alternative in relation to the currently constantly rising electricity prices. Is photovoltaic in Poland a good investment?

To be short and blunt - we all know that PV gives us renewable electricity obtained from the sun for free. But how exactly does this whole system work in Poland?

What is the largest solar PV market in Poland?

By geographical distribution, the largest share of solar photovoltaic (PV) capacity in Poland is belonging to the Lublin province with more than 10 % of all installations in the country. Is it possible Polish solar PV market to start growing sizeable in the near future?

Are photovoltaic panels available in Poland?

Marta Walendzewicz, Board Member of Menlo Electric, explores the availability of photovoltaic panels, trends, and challenges in the Polish photovoltaic market and the importance of choosing the right inverter. As we move further into 2023, the photovoltaics market in Europe and Poland has seen a range of fluctuations in prices.

How much does a photovoltaic installation cost in Poland?

The unit price of a photovoltaic installation in Poland decreases with increasing power. In 2020, the average cost of a 5kW installation amounted to 5.5 thousand zloty per kilowatt. Get notified via email when this statistic is updated. Access All Statistics. Starting from You only have access to basic statistics.

Is there a demand for photovoltaic inverters in Poland?

As the photovoltaic market in Poland continues to evolve, the demand for inverters in the 20-150 kW range for commercial installations has largely been met with improved availability. However, as mentioned earlier, the market still experiences shortages of inverters above 200 kW, which can result in waiting times of over a year.

How big is Poland's PV capacity?

The current cumulative installed PV capacity in the country by the end of 2020 stays exceeds 3,700 MW (3.7 GW) and scored impressive growth in the past 3 years, but this represents the potential for further growth if the Polish government finds suitable balance for its several times changed in recent years renewable energy policy.

How much PV capacity will Poland have in Q3 2023?

The current cumulative installed PV capacity in the country by the end of Q3 2023 stays exceeds 18,000 MW (18 GW) and scored impressive growth in the past 4 years, but this represents the potential for further growth if the Polish government finds a suitable balance for its several times changed in recent years renewable energy policy.
