

## European Solar and Energy Storage Solutions

# Solar Power Jacket

## Overview

---

Can a solar-powered jacket be machine washable?

The goal of the project was to make a garment with the solar cells completely concealed. Instead, the multidisciplinary team hid the solar cell underneath the textile of this prototype jacket and optimised the fabric so that enough light could pass through to power the wearable. It also made the Sun-Powered Textiles machine washable.

How does a solar-capturing jacket work?

According to the company, the jackets capture energy from the sun and artificial light sources to “convert and store as heat—increasing the in-clothing temperature by 18°F in only two minutes.” The company’s solar-capturing smart fabric technology is designed to keep you warm without all of the bulk typically required for optimal warmth.

How does a solar-powered wearable sensor work?

The team tweaked the textile structure, density, colour and finishing treatments to allow as much light through as possible. The power from the solar cells is transferred to the wearable sensor devices via conductive fibres incorporated into the garment. The conductive fibres are flexible and can be stretchy.

Can solar panels make clothing invisible?

Design and physics researchers at Finland's Aalto University have worked together to create clothing with concealed solar panels, making the technology invisible to the naked eye.

Should you wear a thermal jacket if the sun goes down?

And the specially designed fabric should also help prevent you from overheating. As for what happens when the sun goes down or it’s not particularly sunny, ThermalTech said, the jackets can reflect and capture your

own body heat.

Are solar-powered watches a good choice?

Watches are one of the few consistently available solar-powered pieces on the market, due to the simple technology they require. Rather than using a traditional battery to operate, many brands like Skagen store energy from natural light in a self-recharging battery. We're particularly fond of this unisex Casio style.
