Overview

What is a solar lantern & how does it work?

It's the perfect all-purpose solar device to light up your campsite, family tent, or provide back up power to your devices when you need it most. The lantern provides over 200 lumens of bright LED light on Turbo mode and can run for up to 50 hours on Low mode.

Which solar lantern is best for camping?

When you're sleeping in the wilderness, you need a powerful light source. Ditch heavy, toxic batteries for the best innovative solar lanterns. ZDNET's top choice for lighting up your night is Mpowerd's Luci Pro Outdoor 2.0. Camping trip preparation depends on where you're going and how you're getting there.

Why should you buy a solar lantern?

Bonus points go to the USB output port that charges other devices in a pinch. Built-in solar panels mean brighter lights and lower energy consumption, and two brightness modes (bright and super bright) function to give you proper lighting depending on the situation. This lantern is also a great handheld size, perfect for campsites and young hikers.

What is the best solar lantern?

The Mpowerd Luci Pro Outdoor 2.0 is ZDNET's top choice for best solar lantern-- it does so many things right. At 150 lumens, it offers substantially bright lighting thanks to 10 LED bulbs. The reliable battery lasts for 45 hours and can recharge even on cloudy days. It acts as a mini solar panel that can also charge your headlamp and phone.

Which solar lantern is right for You?

Featuring a marine-styled design with a warm LED tungsten Edison bulb, the Pearlstar Solar Lantern is the perfect choice for adding ambiance and charm to any outdoor space. We love the all-metal construction, and replaceable

batteries and bulbs extend the light's service life.

Can a solar lantern be used as a lamp?

Even though it gives out light patterns, it's strong enough to be used as a lamp. The solar panel is located at the top, so it easily collects solar energy. The lantern needs 8 hours to reach full charge and lasts for 6 to 8 hours. Why Do I Like It?

I like the light pattern it gives out and that it's bright to be used as a lamp. 7.
