# Solar Street Light Thickening Bracket

## Overview

---

How much weight can a solar light mounting bracket hold?

Install light poles with a minimum size of 1.5 inches and a maximum size of 3.5 inches. Please note that the thickness is 0.5mm. The solar mounting bracket can hold up to 150 pounds. The solar light mounting bracket is used in outdoor lighting, we do not recommend you install other products more than 150 pounds. DURABLE METERIAL AND IS TO INSTALL.

Are solar panels bad for street lighting?

Admittedly, one of the drawbacks of street lighting design is the aesthetics of a solar panel. They aren't the most attractive addition to a lighting system, but that doesn't mean you have to install ugly lights in a park or city area. If aesthetics are a concern, there are options to divert attention away from the solar panels.

What are the features of a Pole mounting bracket?

Specially designed pole mounting bracket allows different tilt angles, lateral and pole top mounting. Adjustable LED module for better distribution of light when required. Factory set dimming profile along with microwave sensor for run time maximization. Dimming can be configured at site with the help of configuration remote controller.
