Solar generator for the whole home

Overview

What is a solar-powered whole house generator?

A solar-powered whole house generator is a pioneering solution in residential energy backup systems. Engineered to utilize solar energy, it ensures homes stay powered during grid outages and emergencies, reflecting a shift towards sustainable energy practices.

What is the best solar-powered generator for home backup in 2024?

Not any more. Read on to find the best solar-powered generator for home backup in 2024 — and beyond! The EcoFlow DELTA 2 solar generator is the perfect entry-level home backup solution. With the option to choose between one or two EcoFlow 220W bifacial portable solar panels, you get a ton of bang for your buck.

Can a solar generator power a whole house?

Probably not, unless you get a large solar generator and you have a tiny home. Solar generators are meant to power and charge just a few electronics, not the entire house. If you want to backup your entire house, go with a wired system complete with solar panels on the roof and a high-capacity battery bank.

Are solar generators a good option for your home?

Solar generators are quiet, lack any harmful fumes and exhaust, and are completely renewable. With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone.

Where can I buy a solar generator?

Get the EcoFlow solar generator at Amazon (1 solar panel), The Home Depot (solar panels sold separately), Walmart (solar panels sold separately), Campervan HQ (1 solar panel), or EcoFlow (1 solar panel).

Why do you need a whole-house solar generator?

Harvesting the clean, renewable energy of the sun allows your solar generator to be recharged during a blackout and provides sufficient power to keep your home running. A whole-house solar generator provides peace of mind and allows your family to weather extended power outages while maintaining your day-to-day life.
