The five main steps to installing a solar panel system include an engineering site visit, permits and documentation, ordering equipment, the solar panel installation, and approval and interconnection.

How To Install Solar Panel Mount Systems
Sloped Roofs A railed system, a set of rails that hold the solar modules, is used for pitched roofs. You need to first identify the rafter locations. Flat Roofs Flat roof installations often use a ballasted racking system, which harnesses the power of gravity. Ground Mounts Ground-mounted systems require a different approach.
