

European Solar and Energy Storage Solutions

Solar power automatic water pump

- ☑ High energy density and long cycle life
- ☑ Modular structure

No need to replace the battery

Shorter charging time

Meets 99% EV car

Overview

What is a solar water pump?

Solar water pumps are simply a type of pump that is powered by the sun and helps draw water from wells or other sources. This allows you to harness solar energy for more than just home electricity needs. The power to the pump is generated by solar panels which are placed at the highest point possible.

How does a solar pump work?

The solar pumps draw water from your rain barrel and pump the water to your plants through a drip irrigation system. The smaller size is best suited for 12x 20L pots, or 12 tomato plants, or 24 pepper plants, or 36 strawberry plants, or a combination up to 12m in length for raised beds. The larger unit has double the capacity.
