Solar power generation installation in

Overview

How long does it take to install a solar power system?

Installation of solar power system. The installation of a solar power system on your property can take anywhere from 1-7 days, depending on the availability of contractors, permits, and materials required.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole house solution. When your assessment is complete, we'll follow up with a quote.

What is solar photovoltaic (PV) power generation?

Solar photovoltaic (PV) power generation is the process of converting energy from the sun into electricity using solar panels. Solar panels, also called PV panels, are combined into arrays in a PV system. PV systems can also be installed in grid-connected or off-grid (stand-alone) configurations.

How do I choose a solar panel system for my home?

Before you size a solar panel system to fit your energy needs, consider undergoing a home energy audit to uncover anything that makes your home less efficient. Switching to energy-efficient lighting and appliances or weatherizing your home may help to lessen your electricity expenses. 2. Determine if your home is structured for solar.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar.

See the Spanish version [here](#).

Should I buy or install a solar system?

Purchasing and installing a system that you fully own and maintain is no longer the only option if you want to go solar. Even if you rent your home or don't want to purchase a rooftop system, there are many programs will enable you to still benefit from solar electricity.
