

Solar wasserstoff system DR Congo

Overview

How much solar power is available in Kinshasa?

In the area around Kinshasa there is a further 6 gW of solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa, Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

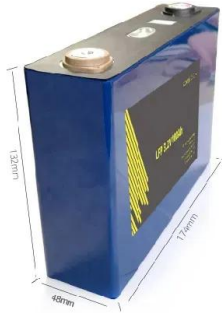

Is the DRC a hydroelectric country?

This has given it enormous potential for hydro electric power and almost 100% of its grid power is HEP. The DRC is the largest country in Sub Saharan Africa occupying 2,345,000 km² with 3.32% as standing water including rivers and lakes. Its sheer size, lush vegetation and landscape has been its problem since independence in 1960.

What is the capital of Congo?

The largest city and capital is Kinshasa with 12 million in an urban area of 600 km². It stands on the Congo river at the head of the Congo navigation system from where a railway carries exports and brings in imports from the port of Matadi.
