Are solargaps blinds a good investment?

With the ability to generate enough power to run 30 LED light bulbs, SolarGaps blinds are the perfect combination of IoT smart home device and intuitive renewable energy source. This is a no-brainer purchase for anyone interested in jumping on the road to energy independence without forking over the dough for solar panels.

What are solargaps smart blinds?

Designed to track the sun, SolarGaps smart blinds automatically adjust their position to optimal energy harnessing angles. With the ability to generate enough power to run 30 LED light bulbs, SolarGaps blinds are the perfect combination of IoT smart home device and intuitive renewable energy source.

How does solargaps work?

From opening and closing your blinds remotely to checking on the most recent energy storing metrics, the highly intuitive SolarGaps app keeps you in control of your blinds at all times. You can even program your smart blinds to open when you wake up and close when it's bedtime.

Do solargaps blinds generate electricity?

The world's first smart blinds with solar panels are the world's first blinds, that when bought can generate enough return to cover the acquisition cost, usually on a average time period of around 5 years. After this period, you already receive income from their use. Eco energy production. Yes, SolarGaps blinds generate electricity.

How effective are solar panels in creating solargaps?

The effectiveness of solar panels in the process of creating SolarGaps has become the most important point for us. As the amount of space for placing solar elements is limited to the size of the slats, these photovoltaic elements

should be very productive.

Which smart home devices are compatible with solargaps?

Secondly, SolarGaps are compatible with most IoT smart home devices and digital assistants. Whether it's Google Home, Amazon Echo, Nest Thermostat, or Philips Hue Light Bulbs, if your plan is to create the ultimate smart home, SolarGaps blinds fit right in.
