Solomon Islands solar panel with inverter and battery

Overview

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How many solar homes are there in the Solomon Islands?

“Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems,” said Mr Aimaea.

Can solar power improve life in the village?

In short, solar power can improve life in the village in many ways. We specialise in custom-designed solar power solutions for food trucks, street vendors, and container houses.

A real-life detailed case of solar installation in Solomon Islands

The installation would involve mounting the solar panels on the roofs of the houses, installing the inverters, and connecting the battery storage units to the system. The technicians would also

provide training to the villagers on how to use and maintain the system.

Solar PV Arrangements

Solomon Power (herein referred to as Solomon Power). The PV inverter system will usually consist of a photovoltaic array on the roof of the building and a suitable grid-connect inverter connected to the metering box. This arrangement allows solar energy to be supplied to meet the customer's installation load and be backed up by the Solomon
