Volvo Penta bringing 'heavy-duty' DNA to battery storage market

As covered here, Volvo Penta launched a battery energy storage system (BESS) sub-system solution in March this year. The product is a partial BESS product, which lacks a SCADA or energy management system (EMS) and container design, which the firm is selling to OEMs and system integrators to containerise and deploy.

Sottosistema Volvo Penta BESS

I sistemi di accumulo a batteria (BESS) potenziano l'affidabilità, la capacità e la resilienza della rete elettrica attraverso lo stoccaggio e la distribuzione dell'energia. Volvo Penta sta sviluppando un sottosistema dedicato, scalabile e progettato ad hoc, con l'obiettivo di migliorare l'efficienza e la performance nella distribuzione energetica, mirando a un futuro a emissioni zero.

How LS Energy Solutions and Volvo Penta Drive Innovation in BESS

Volvo Penta is expanding its footprint in the BESS market by introducing purpose-built battery subsystems that prioritize energy density, durability, and adaptability. These systems are designed to meet diverse energy demands, from supporting microgrids in ports and quarries to providing reliable backup power for data centers and hospitals.

Volvo Penta's battery energy storage expertise advances

Volvo Penta is advancing its net-zero initiatives by providing its battery energy storage subsystem to BESS manufacturers venturing into charging infrastructure support. This is exemplified in a recent collaboration with ...

Volvo Penta's battery energy storage expertise advances

Volvo Penta is advancing its net-zero initiatives by providing its battery energy storage subsystem to BESS manufacturers venturing into charging infrastructure support. This is exemplified in a recent collaboration with TecnoGen, part of the Bruno Generators Group (BRG).

Volvo Penta and UIG partner to support grids with BESS

Just days after announcing its strategic entry into the battery energy storage (BESS) sector jointly with OEMs, Volvo Penta as a BESS subsystem supplier has unveiled a partnership with Utility Innovation Group (UIG) aimed at US and international markets. The two companies are collaborating to enhance power grid reliability and resiliency through battery ...

Volvo Penta expands into battery energy storage with OEMs

In a strategic move to supplement its power generation business and tap into new segments,

Volvo Penta is launching a new offer - a high-performance subsystem based on the Volvo Group's electromobility platform, optimized for OEMs' BESS applications. "Battery energy storage is increasingly in demand for a variety of applications including utilities, ...

Volvo Penta Launches Energy-Dense BESS Subsystems for ...

Volvo Penta's BESS subsystem is also designed to withstand tough environments, offering robust protection against dust and corrosion for reliable performance in challenging conditions. With ingress protection (IP) ratings and corrosion-resistant materials, it is built for durability and dependability in tough environments.

114KWh ESS

Volvo Penta bringing 'heavy-duty' DNA to battery ...

As covered here, Volvo Penta launched a battery energy storage system (BESS) sub-system solution in March this year. The product is a partial BESS product, which lacks a SCADA or energy management system ...

Volvo Penta's battery energy storage expertise advances

Earlier in 2023, Volvo Penta declared its provision of subsystems for Battery Energy Storage needs, affirming its dedication to being a dependable partner for BESS manufacturers. Since then, the company has made notable strides in establishing its first customer

relationships.

Approccio alla partnership , Volvo Penta

At Volvo Penta, close cooperation with OEMs is something that comes natural. Potenza e affidabilità - a terra e in mare; Soluzioni Industriali; Approccio alla partnership. Soluzioni per la decarbonizzazione industriale e la produttività Sottosistema Volvo Penta BESS. Carburanti rinnovabili. Potenza e prestazioni, con minori emissioni.

Scaling grid innovation: Volvo Penta expands investment in UIG , Volvo ...

Above: UIG's Energy Storage for Resiliency (ESR) platform with Volvo Penta's BESS subsystem. Building upon the partnership established with Volvo Penta's initial investment in 2023, UtilityInnovation Group (UIG) will scale its expertise to meet the accelerating demand for more dynamic, sustainable electric grid infrastructure. "This follow-on investment in ...

A powerful alliance: Reshaping the BESS landscape together

Recognizing the transformative potential of

BESS, Volvo Penta has acquired a minority stake in UtilityInnovation Group (UIG) to enable the development of resilient and reliable BESS solutions. Strengthened recently by UIG's acquisition of Enicity, we are well-prepared to continue our contribution towards a more resilient energy future.

BESS - Battery Energy Storage System

A BESS can store energy when electricity prices are low, like at night or when a lot of renewable energy is generated. Then, during peak hours when prices rise, a BESS can be used to support charging instead of drawing power from more ...

Battery energy storage subsystem , Volvo Penta UK & Ireland

Battery energy storage systems (BESS) can enhance grid reliability, capacity and resilience through energy storage and delivery. Volvo Penta's energy-dense BESS subsystems are purpose-built to enable OEMs to build transportable, high-performance BESS solutions supporting the energy transition in industries where energy density is essential.

BESS - Battery Energy Storage System

A BESS can store energy when electricity prices are low, like at night or when a lot of renewable energy is generated. Then, during peak hours when prices rise, a BESS can be used to support

charging instead of drawing power from more costly sources - ...

Subsistema BESS Volvo Penta

Uma vez conectado, todos os componentes ativos no subsistema BESS da Volvo Penta são isolados, selados e monitorados pelo HVIL nas caixas de junção. 7. Interface DC. Adaptada do Grupo Volvo, a interface DC da Volvo Penta é calculada para lidar com a capacidade de carga configurada e conectada ao inversor do OEM. Ajudar os OEM's com o

Volvo Penta Launches Energy-Dense BESS Subsystems for ...

Volvo Penta's purpose-built battery energy storage systems (BESS) solutions offering unique strengths that cater to varying BESS scenarios where energy density is a priority, in segments such as construction, ports, and data centers.

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥ 8000

Nominal Energy
200kwh

IP Grade
IP55
