Overview

Who is Solana energy?

Born out of an ESD initiative by South32 Hillside Aluminium in June 2022, Solana Energy has become one of the fastest growing solar installers in South Africa. Providing best-in-quality products and uniquely simple solutions, whether it's commercial or residential, no job is too big or too small for our team of solar specialists.

How does Solana energy contribute to a cleaner and more sustainable South Africa?

Solana Energy contributes to a cleaner, more sustainable South Africa. Sustainability isn't just a buzzword for us; it's deeply ingrained in everything we do. By democratising access to solar in South Africa, we're not just reducing carbon emissions; we're safeguarding tomorrow, today.

Why should you choose Solana energy?

From commercial to residential solar installations, Solana's network of solar installation partners offers a wide range of skills to address your sustainable energy needs, hassle free. Solana Energy is aiming to empower and power-up the communities they operate in. Solana has a social element built into the business model.

What is Solana solar power?

Solana Solar Power Generating Station, with an output capacity of 280MW, is one of the largest concentrating solar power (CSP) plants in the world. It is developed on agricultural land near the city of Gila Bend in the state of Arizona, US, and started generating power in October 2013.

What is the Solana Energy Alliance?

The Solana Energy Alliance is an existing CCA program serving the City of Solana Beach.

What is Solana water solutions?

Solana Energy introduces Solana Water Solutions. We're thrilled to share more on Solana Water Solutions – your new go-to for sustainable and reliable water storage! From residential to commercial setups, Solana's water solutions provide peace of mind with fully customisable systems that fit your needs.

South Africa solana energy

Services
