St Kitts and Nevis wind solar power generator

Overview

How much solar energy does St Kitts use?

In St. Kitts and Nevis, the solar resource averages 5 kWh per square meter. Solar energy is already being used for grid-powered induction lighting and street lights along roadways. A 7 MW waste-to-energy power plant is planned to come online on St. Kitts in 2015.

Will St Kitts & Nevis get a PPA for a wind farm?

Meanwhile, Energy Officer Denasio Frank said that, “St. Kitts and Nevis is in negotiations with a company called North Star for a PPA for a 6.6 megawatt wind farm in Belle Vue, which would give us 6 percent of our energy demand.”.

How much does electricity cost in St Kitts & Nevis?

The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

Do I need a voltage converter in Saint Kitts and Nevis?

If the standard voltage in your country is in the range of 100 V - 127 V (as is in the US, Canada and most South American countries), you need a voltage converter in Saint Kitts and Nevis. You can find voltage converters at Amazon. You can also consider a combined power plug adapter/voltage converter.

Where will St Kitts' solar farm be located?

The solar farm, which will be located in the Basseterre Valley on both sides of the Kim Collins Highway, will span in excess of 100 acres which would ultimately supply 25 percent of the total energy used in St. Kitts.
