State Grid 40 Years Microfilm

Overview

Is Nara a candidate for microfilming?

NARA has some holdings in which a few records are referenced often enough to cause wear and tear. Such records are candidates for microfilming. Most records are not used often enough to justify microfilming. NARA has microfilmed millions of pages of permanently valuable Federal records.

When did microfilm get a significant competition?

Microfilm faced significant competition when National Cash Register (NCR) marketed Carl O. Carlson's microfiche reader in 1961. This storage system placed more than 100 pages on one four-by-six-inch sheet of film in a grid pattern. NCR, a company now known for introducing magnetic-strip and electronic data-storage devices in the late 1950s and early '60s, was responsible for bringing this competition to microfilm.

Are microfilm users relegated to a bare corner of the library?

And, as a librarian once pointed out to me, to make matters worse, users of microfilm are often treated as outcasts and relegated to a bare, unpleasant corner of the library where they cannot disturb the other readers in their struggle with noisy machines." The gold standard of the past!.

Are microfilm machines outdated or obsolete?

Although microfilm machines haven't been mined for their decontextualized parts and are not yet truly obsolete, they are still in widespread use. Their mechanical simplicity could help them last longer than current electronic technologies.

Why do universities keep newspapers on microfilm?

Libraries often held archive copies of newspapers on microfilm, and universities used them to keep copies of PhD theses, since the amount of space needed to store them was much less than for the physical documents.

When did we use gridded land cover data?

We used gridded land cover data from the NLCD in 2001 69 and 2016 70, as well as gridded LCZ urban land use (temporally referenced approximately in 2016-2018) available for the CONUS 71.
