# Storage room solar separation light

## Overview

---

What is a solar shed light?

This solar shed light is built with our latest solar patented technology: the GS solar LED light bulb which illuminates at 250 Lumens per light, in a bright-white (6000K) color temperature. Shining at the brightness of 500 Lumens total, the solar shed light is ideal for illuminating sheds, utility closets and outdoor work spaces.

How do solar shed light fixtures work?

Solar shed light fixtures are a simple way to add lighting to your shed. The setup for most of the systems below is as simple as drilling a spot for the light, securing the panel, and then letting it charge up so the next time you need a light, the panel will provide enough charge to light the bulb.

Can a solar panel light a shed?

The solar panel of the unit should always be exposed to direct sunlight. so if the solar panel has charged to the capacity needed (5-6 hours per day), then the lighting units will be able to illuminate inside of the shed.

How long does it take to return a solar shed light?

Return this item within 90 days of purchase. The GAMA SONIC Light my Shed IV is a solar shed light with 2-lights included. This solar shed light is built with our latest solar patented technology: the GS solar LED light bulb which illuminates at 250 Lumens per light, in a bright-white (6000K) color temperature.

Can a solar shed light be installed on a roof?

If you want to install lighting in your shed to be able to quickly turn on and grab the tool you need, buying a simple solar shed light from Amazon makes the most sense. But if you use your shed as an extension of your house, adding a solar array to your shed roof is a great idea.

What is a 10-led rechargeable solar panel shed light?

**Read Return Policy** The 10-LED Rechargeable Solar Panel Shed Light allows you to add illumination to needed areas without having to hardwire a new fixture. This shed light can be wall or pole mounted up to 16 ft. away from fixture using the 16 ft. extension cord, so you can place the solar panel in the location where it will get the most sun.
