how did you determine that the fault that causes the BMS to shut off the output mosfets to be on channel 18? did you measure the voltage across the sense wire pins on the BMS for channel 18? and each channel adjacent?

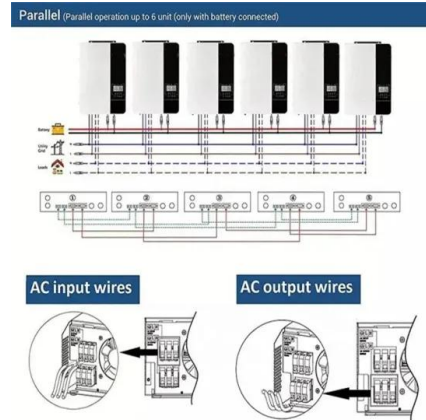

Bestechpower BMS

this is a D131 24S lipo BMS with the signal lines opened above the 20S level to prevent false HVC and LVC signals from the 'ghost' cells above. i was able to restore this BMS to 24S by resoldering the resistor on the LVC line and resoldering that resistor on the HVC line on top back onto the pads to reconnect the signal line to the bottom of 21S.

BMS Thread

Including some in-community-house

developments such as DIEBMS I stumbled across this "Smart BMS" - The idea of a true smart BMS seems appealing over say a D140, but it makes me wonder what else is out there, and what works for people. Im currently looking for a 10S BMS to replace the Raptor 2.0-2.1 BMS as they love to burn out.

i don't expect this pack will ever see the 4.25V cutout again. it is now down to 35mV spread over 24 cells. mark uses a 12A power supply to

charge them but the total is 16Ah so i think it will never have more than 10-15mV internal resistance induced delta V. That sort of statement holds true

for the 24s there is one 9pin connector and 2x 8pins. making 25 wires (those come with the bms). yesterday when installing it i thought a long time how to connect everything. i already had 4x 6s jst-xh connectors installed. good to connect celllogs for monitoring them or for balance charging with my bc168. i thought of removing those and to

Intro to BesTech BMS Systems

The Bestech BMS' have various models for wide variety of uses. I am at present revisiting the HS-015 but there are others worthy of consideration. Please Note that these are not "discount value BMS", they are more in line with TinyBMS and higher level systems.

BesTech Power designs,develops and manufactures Li-ion/Li-Polymer/LiFePO4 battery PCM,PCB,BMS. From us you can find almost all the battery controller/PCB/PCM/BMS you need,even you can not find the one you need,then we can develop one out in 3-5 days.

Choosing the right BMS

I am trying to choose a battery management systems (BMS) from BesTech Power. These are rated, in part, according to amperage. Ida Li, BesTech sales rep, says I should determine the "maximum continuous amperage" of my system. (Note: I am not addressing battery pack voltage or overall amp hour capacity here.)
