

## European Solar and Energy Storage Solutions

# Sunpalo solar energy inc Armenia

## Overview

---

Does Armenia need a solar power plant?

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor. Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank.

Are solar panels legal in Armenia?

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA). In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters).

How much solar energy does Armenia produce a year?

According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour (kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production.

Why do Armenians use solar energy?

The reason for this is that average solar radiation in Armenia is almost 1700 kWh/m<sup>2</sup> annually. One of the well-known utilization examples is the American University of Armenia (AUA) which uses it not only for electricity generation, but also for water heating. The Government of Armenia is promoting utilization of solar energy.

Where is the biggest solar water heater in Armenia?

The biggest solar water-heater in Armenia is located at Diana hotel in Goris, which has 1900 vacuum tubes that provide hot water for a swimming pool with 180 cubic meter volume, and for 40 hotel rooms.

### Solar power in Armenia

Solar panels at Armenian National Agrarian University, Yerevan. Solar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power. [1] The use of solar energy in Armenia is gradually increasing. [2]

### Home

The Philippine government's goal is to boost the renewable energy share to 35% by 2030 and 50% by 2040. Solar will play a big role in making that happen due to its versatility. But to reach our target, we'll need to produce at least 18 GW of solar energy plants.

### More solar power projects still awaiting DOE approval

Projects in Visayas include the 120-MW Bacolod City solar power project of Asian Solar Options Corporation and the 100-MW San Miguel solar power project of Sunpalo Solar Energy Inc. The 60-MW Manolo Fortich ...
