

European Solar and Energy Storage Solutions

Sunware solar panels Belize

Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

Overview

Where are sunware solar panels made?

SunWare solar panels are designed and manufactured for extreme application conditions. From use on sea buoys and boats to avalanche bridges, SunWare marine solar panels and solar systems are used worldwide wherever reliability, durability, robustness and freedom from maintenance are required. Made in Germany by SunWare.

What are sunware solar panels used for?

SunWare solar panels are designed for extraordinary wind and temperature loads. Usage, among other things, in safety-relevant technology such as avalanches and glacier monitoring devices. Solar systems for public spaces.

What are sunware solar panels & charge controllers?

Developed for the harsh conditions at sea - SUNWARE solar panels and charge controllers. Since 1987, the company has been developing solar panels for the special challenges of saltwater usage, while always paying the greatest attention to quality. Learn more about SUNWARE. [Go to video.](#)

Why should you choose sunware?

SunWare provides the opportunity for even smaller series (approx. 50 pieces) of customized panels. The system design is carried out in close cooperation with the customer. The panel can be adapted both in form and color as well as in the mechanical design requirements.

Why should you choose sunware solar modules?

Especially for the public space Non-Glass-Modules are perfectly suited. SunWare solar modules are even used for remote places and in most unusual applications. In this example, the solar modules were designed to the specific climatic conditions at 3500m altitude. In addition to extreme wind loads, temperatures are also special requirements.

Can sunware solar modules be adapted?

SunWare solar modules can be adapted in form, color and mechanical design requirements. At remote areas, it`s thanks to LED lighting technology now often cheaper to install PV-powered street lighting than having expensive cables for miles.

Sunware solar panels Belize

Solar Panels Series-20

Description lightweight, compact and extremely powerful. The solar panels of the series-20 white are light, very compact and extremely powerful. The monocrystalline PERC high-performance solar cells are protected in an EVA laminate and ETFE coatings against weathering. Even in diffused light conditions or even in winter, the modules produce a high charging current.

SunWare Solar Panels , Walkable Solar Panels

SunWare solar panels very effectively maintain and top-up batteries whilst sailing or moored up, whether living aboard or weekend sailing there's a solar solution for you. In fixed applications the wide choice means that Marlec can find the ...

Sunware Semi Flexible Solar Panel

Sunware series-20 semi-flexible solar panels are light, very compact and extremely powerful. The multicrystalline high-performance solar cells are protected in an EVA laminate and ETFE coatings against weathering. Even in diffused light conditions or even in winter, the modules produce a high charging current.

Solar Energy Solutions Belize , SESB

Experience the power of the sun with our cutting-edge solar solutions in Belize. Our expert team is committed to providing affordable and reliable solar energy for your home or business. Say goodbye to high electricity bills and embrace a ...

SunWare , Ultra flat solar panels for boats, buoys & off grid

SunWare solar panels are designed and manufactured for extreme application conditions. From use on sea buoys and boats to avalanche bridges, SunWare marine solar panels and solar systems are used worldwide wherever

reliability, durability, robustness and freedom from maintenance are required. Made in Germany by SunWare.

Solar Panels Series-20

The solar panel adapts to curved surfaces, with maximum curvature of 3cm/m panel length. Inside the panel package there are white screw rosettes for countersunk screws. It prevents damages of the panels laminate by the screw head. The solar panels are designed for the harsh marine and salt water use. The cable outlet is screwed to the mounting

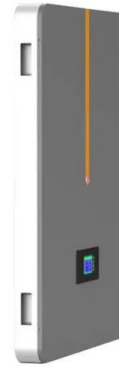

SunWare , Ultra flache Solarmodule für Boote, Bojen & Off Grid

SunWare Solarmodule werden für extreme Anwendungsbedingungen konstruiert und gefertigt. Für die Anwendung auf Seeboje, Boot bis hin zu Lawinen Sprengmasten werden SunWare Solarmodule und Solarsysteme weltweit überall dort eingesetzt, wo es auf Zuverlässigkeit, Langlebigkeit, Robustheit und Wartungsfreiheit ankommt. Made in Germany by SunWare.

SunWare

Solar systems / panels for special applications. SunWare provides the opportunity for even smaller series (approx. 50 pieces) of customized

panels. The system design is carried out in close cooperation with the customer . The panel can be adapted both in form and color as well as in the mechanical design requirements.

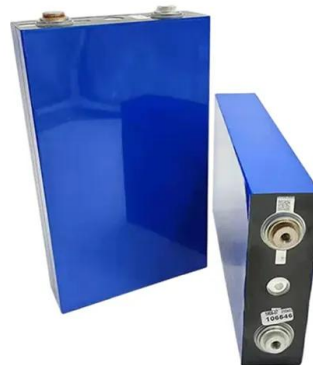

Sunware

SunWare have been making solar panels and regulators in Germany for over twenty years. Their panels are designed and tested specifically for use in marine environments and salt water, they are completely maintenance free, durable, and weatherproof even under extreme exposure whether in the Caribbean, the Mediterranean, or the North Sea.

Solar Energy Solutions Belize , SESB

Experience the power of the sun with our cutting-edge solar solutions in Belize. Our expert team is committed to providing affordable and reliable solar energy for your home or business. Say goodbye to high electricity bills and embrace a sustainable future.

SunWare Solar Panels

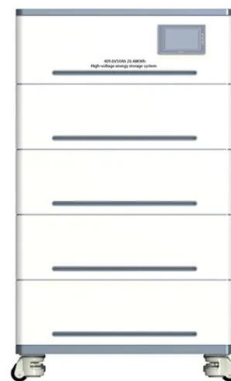

The Sunware Series 20 solar modules are specifically designed to be lighter, more compact and more powerful than the previous generation Sunware solar panels. The Series 20 solar panels include high performance solar cells with an EVA laminate and ETFE coating for improved durability, even in harsh applications like sea buoys or other salt water marine environments.

...

Solar Panels Series-40

Description lightweight, compact and extremely powerful. The solar panels of the series-40 black are light, very compact and extremely powerful. The monocrystalline PERC high-performance solar cells are protected in an EVA laminate and ETFE coatings against weathering. Even in diffused light conditions or even in winter, the modules produce a high charging current.

-  **All in One**
Integrating battery packs
-  **Intelligent Integration**
Integrated photovoltaic storage cabinet
-  **High-capacity**
50-500kWh
-  **Rated AC Power**
50-100kW
-  **Degree of Protection**
IP54
-  **Altitude**
3000m(>3000m derating)
-  **Operating Temperature Range**
-20-60°C(Derating above 50 °C)
