

European Solar and Energy Storage Solutions

Tbb renewable Cambodia

Overview

Who is TBB renewable?

Founded in 2007 with a location in Xiamen city, TBB Renewable is a complete power solution provider, focusing on backup power solutions, off-grid solutions, off/on-grid ESS solutions, and hybrid ESS Solutions. TBB presented a comprehensive range of solutions tailored to meet the diverse needs of residential and C&I customers.

Why should you choose TBB renewable?

TBB Renewable provides comprehensive service and support to you to help you grow and achieve optimal satisfaction. TBB's backup power & off-grid product line, scalable up to 72kW, addresses unstable or absent grid supply, ideal for remote areas and regions like Africa, South America, the Middle East, and Southeast Asia.

What types of energy storage systems does TBB offer?

Apart from flexible power solutions, TBB offers plug-and-play all-in-one energy storage systems for backup power, off-grid, hybrid ESS, mini-grid, and C&I ESS applications. These systems are expertly assembled, pre-wired, tested, and shipped as complete units, with power and battery capacities up to 1MW and 4.3MWh.

What is TBB Nova & how does it work?

The free NOVA platform, available as an app and web interface, provides real-time data and historical records, allowing control of TBB products anytime, anywhere. TBB also offers essential accessories like power distribution boxes for comprehensive power solutions.

What is a TBB microinverter?

TBB's Microinverter series is ideal for residential rooftops and balconies, especially when there are multiple orientations, shading issues, or complex

layouts. They optimize the performance of each individual panel, ensuring maximum solar energy production, making them perfect for users with precise efficiency management requirements.
