Palmetto, Solar Energy World, and Blue Raven Solar are the best solar companies in the U.S., based on a review by the MarketWatch Guides team.

Our top choice for the best overall solar company is Tesla. Installing solar panels from a top-rated company can come with high upfront costs. The federal solar Investment Tax Credit (ITC) offers a 30% tax reduction on the cost of a new solar energy system until 2033, after which it will gradually decrease expiring in 2035. Is Tesla a good company to buy solar panels?

Tesla might be primarily known for its electric vehicles, but the company also produces solar panels and solar shingles to help homeowners live more sustainably. These panels are also among the most affordable in the industry thanks to Tesla's price-match guarantee. If a customer gets a lower quote from another company, Tesla will match that price.

Is Qcells a good solar panel company?

Qcells is more of a solar panel manufacturer than a solar panel installer, but representatives for the company will connect you with installers that works

with Qcells' products. The company doesn't offer the same guarantees or policies most of the installers on this list have, so it doesn't get a score.

How much does a polycrystalline solar panel cost?

Polycrystalline solar panels have efficiency ratings ranging from 13% to 20%. Due to lower production costs, they generally cost between \$0.75 and \$1 per watt. Thin-film solar panels are rapidly improving in efficiency and durability and now experience ratings of between 9% and 18% and rising.
