It is also believed to be the first solar array in the country installed for the sole purpose of generating 100 percent of the electricity .

We are solar-powered, primarily by on-site renewable sources; we have our own solar canopies. Our owners are actually just pulling permits as we speak to add a wind turbine as well.

The Marcel—named for its celebrated modernist architect Marcel Breuer—opens in New Haven in May as an all-electric hotel that generates its own power with a rooftop solar array and solar .

As a net-zero—and potentially net-positive facility—the Hotel Marcel expects to meet or exceed its energy demand through 1,000-plus solar panels installed atop its rooftop and parking canopies. On cloudy days or at nighttime, the hotel pulls power from the grid or from its on-site battery, which has a 1 MWh capacity.
