The largest solar power plant in East Africa

Overview

The solar farm sits on 85 hectares (210 acres) and consists of 200,200 solar panels and is expected to be the largest in East and Central Africa. It is expected to create about 1,000 jobs during the construction period. The power from this power station is enough to power about 625,000 homes. The power station is owned and operated by , a agency.

The Garissa Solar Plant is the largest grid connected solar power plant in East & Central Africa.

The Garissa Solar Plant is the largest grid connected solar power plant in East & Central Africa.

This project carried out in the close cooperation between China and Kenya will build a 50-MW photovoltaic power plant in the East Africa region, and the largest one ever.

The solar farm sits on 85 hectares (210 acres) and consists of 200,200 solar panels and is expected to be the largest in East and Central Africa.

Uganda has launched a 19 million U.S. dollar solar power plant In the remote eastern district of Soroti, Uganda.

Made up of 32,680 photovoltaic panels, the new 10 megawatt Soroti Solar Plant is the country's first grid-connected solar plant and will generate clean, low-carbon, sustainable electricity to 40,00.
