Overview

Will Türkiye increase wind and solar capacity by 2035?

Türkiye aims to increase installed wind and solar capacity to 120,000 megawatts (MW) by 2035, requiring nearly \$80 billion investment, Turkish Energy and Natural Resources Minister Alparslan Bayraktar said on Monday.

How many MW will Türkiye have by 2035?

By 2035, Türkiye will "quadruple" its current capacity of 30,000 MW, he said during the Energy Transformation-Renewable Energy 2035 meeting in Istanbul, bringing together key players in the energy sector.

What are Türkiye's energy policies?

Bayraktar also said that Türkiye's energy policies are driven by three key goals, including the security of supply, reducing foreign energy dependence and achieving net zero emissions by 2053. The Turkish minister said that the share of renewable energy in Türkiye's total installed electricity capacity reached 59% as of September.
