

European Solar and Energy Storage Solutions

U S Virgin Islands solution for power

Overview

Power generation in the U.S. Virgin Islands has been challenging due to aging infrastructure that has resulted in reduced efficiency, increasing.

In 2013, WAPA contracted APR Energy for a temporary power solution based upon a GE TM2500 mobile gas turbine on the island of St. Thomas.

APR Energy's technology has proved to be superior in reliability when power was needed most. When Hurricane Maria hit the islands in 2017, APR Energy was one of the only power sources.

Solar energy and battery backup systems offer a sustainable solution to the islands' energy woes, harnessing the abundant Caribbean sunshine to provide electricity even during grid outages.

U S Virgin Islands solution for power

FACT SHEET GRID RESILIENCE STATE AND TRIBAL FORMULA

...

U.S. VIRGIN ISLANDS As states, tribes, and territories face threats from severe weather, the Grid Resilience State and Tribal Formula Grants will distribute \$2.3 billion over five years to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate crisis.

US Virgin Islands to cover 30% of power needs with solar-plus

...

Honeywell Process Solutions has announced plans to install about 124 MWh of its battery energy storage systems alongside 140 MW of solar at six sites to help the US Virgin Islands cover 30% of

Energy Snapshot U.S. Virgin Islands
