Uninterrupted power supply for home Cambodia

Overview

What is an uninterruptible power supply (UPS)?

However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in. Its main function is to act as a big battery that powers your devices when your electricity goes out.

Do smart devices need an uninterruptible power supply (UPS)?

Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in.

How many outlets does the Cyberpower cp800avr ups have?

And the CyberPower CP800AVR UPS System, rated 800VA/450W, is perfect for just that. The UPS has four outlets with battery backup and surge protection and four with just surge protection. Four outlets are nicely spaced out, so you can easily connect devices with larger plugs.
