

European Solar and Energy Storage Solutions

Urban energy solutions Svalbard and Jan Mayen

Overview

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

How can Svalbard maintain a secure and sustainable supply?

Furthermore, the case found that the best long-term solution for Svalbard to maintain a secure and sustainable supply would be to integrate a mix of renewable energy technologies. Some of these technologies include: solar panels (PV), wind turbines, heat pumps connected to geothermal and both heat and electricity storage.

Can wind and solar power be used in Svalbard?

23) This approach is supported by an earlier case study prepared by The Nordic Council of Ministers (2018) titled 'De-carbonising Svalbard', 24) which suggests that wind and solar power used in combination with both electric boilers and heat pumps would provide ample electrical supply.

How has Norway reinvented Svalbard's economy?

During this period, towns were built around commercial coal mining activity. Although coal mining is still present, activity is dwindling and Norway has reinvented Svalbard's economy by transitioning towards three main industries: scientific research, education and tourism. 2).

How has Norway diversified its activity in Svalbard?

Besides tourism, Norway has further diversified its activity on Svalbard by investing in high-level Arctic research. Norway has transformed the ex-mining town of Ny-Ålesund into an international Arctic research hub and established The University Centre in Svalbard (UNIS) in 1993.

Why does Norway need a climate plan for Svalbard?

The Minister of Climate and Environment Sveinung Rotevatn outlines the necessity to protect Norway's commitment to the 2030 and 2050 climate goals whilst ensuring that the project is constructed in a way that does not majorly intervene in the vulnerable natural landscape of Svalbard.
