Bidirectional EV charging explained

Vehicle-to-grid - V2G; Vehicle-to-grid (V2G) is where a small portion of the stored EV battery energy is exported to the electricity grid when needed, depending on the service arrangement. To participate in V2G programs, a bidirectional DC charger and a compatible EV is required. Of course, there are some financial incentives to do this, and EV owners are ...

Vehicle-to-Grid (V2G)

V2G equipment is only approved for installation in South Australia, with other regions awaiting distributor approvals via CEC. Chris Bowen, the Federal Minister for Climate Change and Energy, has announced that the national technical standard has recently been updated relating to V2G chargers. The CEC can now certify chargers, enabling EV
