Where does Venezuela's power come from?

Another major national blackout occurred on 22 July. Most of Venezuela's power comes from one of the largest hydroelectric dams in the world, Guri Dam in Bolívar State, Venezuela on the Caroni River; as of 2019, 70–80% of Venezuela's power comes from Guri.

Does Venezuela have a power grid?

Venezuela's power grid relies heavily on the Guri Dam, a giant hydroelectric power station that was inaugurated in the late 1960s. While the engineers who planned Venezuela's current power grid imagined the Guri Dam would supply about 60 percent of the country's electricity, today it is believed to supply a whopping 80 percent.

How much power does Venezuela have?

Venezuela's installed electrical capacity totals just over 30 GW, split roughly equally between fossil fuels and hydropower. The country's largest single power generator is the Guri hydroelectric project (also known as the Simon Bolivar hydroelectric project), with an installed capacity of 10,235 MW.

What type of energy does Venezuela use?

Venezuela relies heavily on domestic production of fossil fuels, with oil and natural gas comprising approximately 90% of the country's total energy supply. Hydro power also plays a key role in electricity generation, accounting for roughly half of installed capacity.

Who owns the power plants in Venezuela?

EDC has 11% of Venezuelan capacity, and owns the majority of conventional thermal power plants. The rest of the power production is owned by private companies.

How long does it take to get full power in Venezuela?

Miguel Lara, a former general manager for the independent Venezuelan agency that collected data on electricity usage, said full power might be restored within days — or that problems could drag on for weeks.

### Venezuela Slowly Powers Up After Claiming 'Sabotage' of Grid

(Bloomberg) -- Venezuela's electric supply is being reestablished after a 12-hour blackout that hit all the nation's 24 states early on Friday, President Nicolás Maduro said on state television. Authorities are investigating the alleged attack on the Guri hydroelectric plant transmission systems in southeastern Venezuela after the power

### Energy profile: Venezuela

In 2019, Venezuela had installed 5.32 MW of solar power generation capacity and 71.28 MW of wind capacity. Venezuela plans to incorporate an additional 10,000 MW of wind energy by 2035. The use of renewable energy in remote areas would alleviate the risk of blackouts common to much of the country.

### Electricity sector in Venezuela

The electricity sector in Venezuela is heavily dependent on hydroelectricity, which accounted for 64% of the nation's electricity generation in 2021. Besides hydroelectric power, Venezuela also relies on natural gas and petroleum, contributing 25% and 11%, respectively

### AP Explains: What's behind

## Venezuela's historic blackout?

Venezuela's information minister said Tuesday that the power grid had been almost completely restored. But there are still pockets that have now gone six days in the dark. Miguel Lara, a former general manager for the independent Venezuelan agency that collected data on electricity usage, said full power might be restored within days -- or
