Venezuela

The Venezuela Plan for the National Electric System aims to integrate renewables in the power system by including it in medium and long-term strategies. It aims to develop the use of renewables within isolated rural communities including solar, small hyd. Oil is the most widely-traded energy commodity, with millions of barrels of both crude

Venezuela: Energy System Overview

GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

Venezuela

Energy imports and exports. Imports, particularly of fossil fuels like oil, natural gas and coal, make up an important part of the energy supply in many countries. Countries that rely heavily on imported energy may be vulnerable to supply disruption from external events such as the Covid-19 pandemic and the war in Ukraine.
