

European Solar and Energy Storage Solutions

Vergo energi Faroe Islands

Overview

How is energy produced in the Faroe Islands?

In the Faroe Islands, energy is produced primarily from hydro and wind power, with oil products being the main energy source. Mostly consumed by fishing vessels and sea transport.

How many wind farms are there in the Faroe Islands?

Furthermore, external suppliers operate one wind farm and one biomass plant. Total installed capacity in the Faroe Islands is 163 MW and total power generation in 2019 was 386 GWh. Max demand was 63.1 MW in November 2020. In 2018, 49% of power generation came from renewable sources, i.e. hydro and wind power, respectively.

How much electricity is renewable in the Faroe Islands?

In the Faroe Islands, more than 80% of the power for the main grid was renewable on 50 days in 2022. The municipality-owned company SEV is the main electricity supplier, providing approximately 90% of the total production, with private producers contributing the remaining percentage.

Can the Faroe Islands import or export electricity?

The Faroe Islands cannot import or export electricity since they are not connected by power lines with continental Europe. Per capita annual consumption of primary energy in the Faroe Islands was 67 MWh in 2011, almost 60% above the comparable consumption in continental Denmark.

Does the Faroe Islands have a solar park?

The Faroe Islands have a solar park with a 250 kW capacity in Sumba. It is expected to produce 160 MWh/year (i.e. a capacity factor of 7.3% and equivalent to 35 tons of oil), mainly in the summer when rain and wind are low.

Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Vergo enerji Faroe Islands

Energy

There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind. With an existing network of hydropower from mountain streams and lakes, converting other sources of natural power into affordable green energy is a top priority.

One Week Itinerary in the Faroe Islands

Drangarnir sea arch. An awe-inspiring attraction off the coast of Vágur Island. Start your Faroe Islands holiday and itinerary by visiting the small settlement Bøur. This cute hamlet is situated only a short drive from the airport where all flights to Faroe Islands land. In Bøur you will have a great view towards the Tindhólmur islet and the Drangarnir sea-stacks.
