Storage systems for the energy transition: Voltstorage

...

VoltStorage develops and produces energy storage systems based on ecological redox flow technology. With its sustainable storage solutions, VoltStorage strives to achieve the vision of making 100% renewable energy ...

Aeinova and VoltStorage among the 50 most ...

EIT InnoEnergy home page News & events
 Aeinova and VoltStorage among the 50 most promising startups in the EIC ScalingUp 50 Listing. All news, insights and events. All news, insights and events. All news, ...

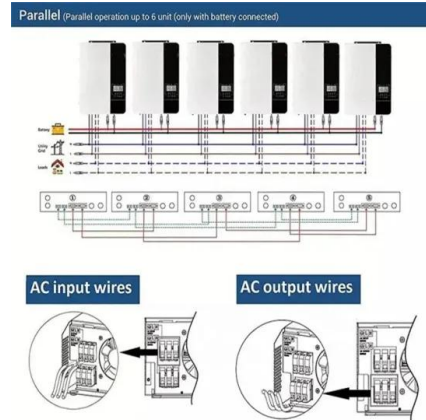

Press Release

VoltStorage, currently employing around 70 people, is the world's leading technology company for stationary redox flow batteries, is making a decisive contribution to a climate-friendly future. With its innovative storage systems based on the particularly ecological redox flow technology,

VoltStorage : Clean Energy Day and Night

VoltStorage GmbH (VoltStorage) is pioneering

the field of redox flow storage technology as it strives to provide the ultimate usability of renewable energy with forward-thinking solutions. To further its objective, the company's technologies and applications are significantly contributing to a sustainable future.

VoltStorage at the ees Europe 2022

High demand for sustainable energy storage solutions from VoltStorage. The ees Europe 2022 is Europe's largest and most international trade fair for batteries and energy storage systems. With the motto „Innovating Energy Storage“, manufacturers, specialist dealers, project developers, system integrators and suppliers presented a wide

VoltStorage on LinkedIn: The new billion dollar battery disruptor!

This Nature paper forecasts that #solar + #energystorage is set to become the cheapest source of electricity across most of the world by 2030. The majority of the switch occurs by 2027. Coal is

12.8V 100Ah

Article: Why Vanadium is the Better Choice for Commercial Use

Andreas Kaplanov joins VoltStorage as Head of Product & Business Development. A seasoned expert in the energy and electricity field,

Andreas will work closely with management and technical teams to ensure that VoltStorage's solutions meet the requirements and demands of its target groups and leverage the positive market momentum that is predicted for the nearer future.

VoltStorage appoints Volker Schulte as new CEO

VoltStorage, developer of the Iron Salt Battery (ISB), announces the appointment of Volker Schulte as its new CEO. With extensive experience in the international energy sector and energy storage technologies, Schulte will lead VoltStorage into its next phase of growth. His appointment marks a pivotal moment for the company as it builds on its

VoltStorage

VoltStorage specializes in the development of innovative battery storage solutions within the renewable energy sector. The company's main offerings include Redox-Flow batteries designed to be resource-saving, cost-efficient, and climate-friendly, enabling round-the-clock use of renewable energy.

'World's only' home vanadium battery storage provider Voltstorage ...

Germany company Voltstorage, claiming to be the only developer and maker of home solar energy storage systems using vanadium flow batteries, raised EUR6 million (US\$7.1 million) in

July.

Company VoltStorage

The VoltStorage success story began in 2016 as a Munich-based startup with the vision of making clean and affordable energy accessible around the clock. Since then, we have been working continuously to give our customers the opportunity to take their energy supply into their own hands and drive the energy transition forward.

VoltStorage at the State Garden Show in Ingolstadt

VoltStorage is part of the future-oriented energy module of the Ingolstadt State Garden Show and provides a climate-friendly power supply on site. The State Garden Show in Ingolstadt takes place from April 21 to October 3, 2021, and is dedicated entirely to the theme of sustainability. In addition to diverse show and theme gardens, the so

Clean Energy

Making 100% renewable energy available day and night, for a fairer and cleaner world - that's the big challenge of our time. With the Iron Salt Battery, we at VoltStorage are developing an innovative and groundbreaking technology and solution for this.

VoltStorage Smart: VRF- Stromspeicher zum Festpreis ?

Der VoltStorage Smart Stromspeicher besteht mit einem hohen Wirkungsgrad und einer langen Lebensdauer. Die Speicherkapazität lässt sich in 6,8 Kilowatt-Schritten an die eigenen Bedürfnisse anpassen und sorgt für einen breiten Einsatzbereich. Optimiert wurde das Speichermanagement jedoch für Eigenheime.

Storage systems for the energy transition: Voltstorage receives 24

VoltStorage develops and produces energy storage systems based on ecological redox flow technology. With its sustainable storage solutions, VoltStorage strives to achieve the vision of making 100% renewable energy

available 24/7.

VoltStorage

Ich bin Jakob, einer der drei Gründer von VoltStorage GmbH, einem Münchner Start-Up mit mehr als 70 Mitarbeitenden. 2016 habe ich gemeinsam mit Felix und Michael VoltStorage gegründet. Unsere Vision war und ist es Erneuerbare Energien rund um die Uhr verfügbar zu machen, um eine grüne, nachhaltige und faire Zukunft zu ermöglichen.

VoltStorage : Clean Energy Day and Night

VoltStorage GmbH (VoltStorage) is pioneering the field of redox flow storage technology as it strives to provide the ultimate usability of renewable energy with forward-thinking solutions. To further its objective, the ...

VoltStorage VDIUM C50

The VoltStorage VDIUM C50, based on eco-friendly redox flow technology, has been specifically designed for self-consumption optimization. With a charge and discharge duration of 5 h - 10 h it is suitable for industrial, commercial and agricultural applications. The storage system

VoltStorage raises EUR24 million to expand product ...

Vanadium flow battery storage system developer VoltStorage has raised EUR24 million (US\$24.3 million) in a Series C, part of which will go to developing a new iron salt-based battery. The Germany-based company has ...

VoltStorage raises EUR24 million to expand product offering beyond ...

Vanadium flow battery storage system developer VoltStorage has raised EUR24 million (US\$24.3 million) in a Series C, part of which will go to developing a new iron salt-based battery. The Germany-based company has raised the capital from Cummins Inc., a large US corporation that develops and distributes engines, filtration, and power generation

Redox Flow development at VoltStorage

How VoltStorage sets new standards in the development of the Redox Flow technology. Munich, February 4th, 2020 - Since 2018, VoltStorage offers the world's first cost efficient

residential storage system based on the ecological Redox Flow technology. Thanks to patent pending production automation and technological developments, VoltStorage

VoltStorage

I'm Michael, COO, at VoltStorage GmbH, a Munich-based start-up with currently more than 70 employees. In 2016, Michael, Jakob and Felix founded VoltStorage. Our vision was and is to make renewable energy available 24/7 to enable a green, sustainable and fair future. As an expert for stationary flow batteries, we want to cover all application
