Wall-mounted solar power conversion

Overview

Wall-mounted solar panels are solar panels installed vertically on the exterior walls of a building. Like traditional rooftop solar panels, they convert sunlight into electricity.

Wall-mounted solar panels are solar panels installed vertically on the exterior walls of a building. Like traditional rooftop solar panels, they convert sunlight into electricity.

Steps Required for the Conversion
Step 1 - Disconnect power and remove the old light fixture: Turn off the breaker/fuse supplying power to the existing light. Step 2 - Install solar panel bracket outdoors: Choose a spot receiving 6-8 hours of direct sun—south-facing roofs/walls are best. Step 3 - Mount new solar light fixture: . Step 5 - Test operation and mount everything permanently: .
