Overview

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

How many reports has WSRW produced on occupied Western Sahara?

WSRW has produced four reports on the energy industry in occupied Western Sahara, two on renewables and two on oil and gas. *Totally Wrong (2013b)* focuses on the activities of the Total oil company in occupied Western Sahara.

Is the Sahara based on economic resources?

The idea of the economic viability of the SADR being based on its economic resources is also found in Shelley (2004) and echoed by MINURSO and UN Special Envoy to the Sahara, James Baker. Kingsbury (2015) establishes that Western Sahara is illegally and militarily occupied by Morocco.

What role did natural resources play in the Western Sahara conflict?

The majority of research undertaken from a historical perspective on the role of natural resources in the Western Sahara conflict focuses on phosphates. Both Lalutte (1976) and Camprubí (2015) see the potential exploitation of phosphates as the key factor in motivating Morocco to invade Western Sahara.

Is natural resource exploitation a problem in Western Sahara?

As the issue of natural resource exploitation in Western Sahara has been conceptualised in very different ways and from the perspectives of a variety of disciplines, the authors have opted for a semi-systematic review of the work done encompassing academic, non-academic, and activist backgrounds.

Does Morocco export phosphorus from occupied Western Sahara?

P for Plunder: Morocco's Exports of Phosphates from Occupied Western Sahara. Brussels: WSRW. Western Sahara Resource Watch. 2019. P for Plunder: Morocco's Exports of Phosphates from Occupied Western Sahara. Brussels: WSRW Western Sahara Resource Watch. 2020. P for Plunder: Morocco's Exports of Phosphates from Occupied Western Sahara.

Morocco to Double Green Energy Output in Western Sahara Ahead of 2030 World Cup. Morocco aims to double green power output in its southern provinces by 2027, investing \$2.1 billion ahead of co

An unjust transition: Energy, colonialism and extractivism in occupied

Energy developments in occupied Western Sahara simultaneously bolster a false energy 'sovereignty' for Morocco (false because Morocco is not legally the sovereign power of Western Sahara): they make Morocco 'energy independent' from other countries in the region, through the expropriation of Western Sahara's resources.

In Scramble for Clean Energy, Europe Is Turning to North Africa

Western Sahara Resource Watch, a Brussels-based NGO allied to the independence movement, estimates that by the end of the decade occupied Western Sahara could be supplying half of all Morocco's wind energy and a third of its solar energy, much of it headed for Europe. Morocco insists that the territory is part of Morocco.

Green Colonialism In Western Sahara

Western Sahara is connected to the Moroccan grid via the capital Laayoune. A new 400kV power connection is planned between Laayoune and Dakhla, and to Mauritania. Through this power-line, Morocco plans to export renewable energy to West Africa.

Renewable energy is fuelling a forgotten conflict in Africa's last ...

Western Sahara is very sunny and surprisingly windy - a natural renewable energy powerhouse.

Morocco has exploited these resources by building three large wind farms (five more are planned)

Western Sahara Resource Watch

Through its roll-out of massive energy projects in occupied Western Sahara, Morocco becomes more economically connected to, and dependent on, the territory it holds under illegal, military occupation. It intends to export energy generated in the territory to Morocco proper, and to sell off any surplus to surrounding countries, including the EU.

Morocco: Another renewable energy project in Western Sahara

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign of solar and wind energy potential.
