3. Strains and Sprains from Lifting .
4. Cold/Heat .

Here are a few things you'll want to avoid when placing your panels:

- Too much shade: Solar panels are at their most efficient when hit with direct sunlight.
- An old or weak roof: You don't want to put solar panels on a roof that can't support the extra pressure.
- Inconvenient or limited space: Theoretically, you can put solar panels just about anywhere.
