What is the VAT rate for photovoltaic panels

Overview

A zero-rate of VAT on the installation of energy-saving materials (ESMs), including solar panels, in residential accommodation, was introduced on 1 April 2022.

A zero-rate of VAT on the installation of energy-saving materials (ESMs), including solar panels, in residential accommodation, was introduced on 1 April 2022.

This means there is no VAT on both the cost of solar panels and the cost of installation – though there are a few exceptions.

The UK currently has a 0% VAT on solar panels for residential and charitable buildings. Scrapping of VAT on solar panels aims to reduce the cost of installing solar panels.

VAT 0% to 5% on Solar Panels: EU approves regulation granting reduced VAT on solar panels from 2023. The Regulation No. 2022/542 was published in the Official Journal of the European Union on April 5. What is the VAT rate on solar panels?

The 0% VAT rate on solar panels will last until the 1st of April 2027. After that, VAT on solar panels will increase to 5% – meaning it won't go back to the 20% rate. You won't need to meet the pre-April 2022 criteria to qualify for the reduced rate either. The 5% VAT rate will apply to solar panels being installed on any residential property.

Are solar panels subject to VAT?

This guidance sets out the VAT treatment of the supply and installation of solar panels. The supply of solar panels is subject to the standard rate of VAT. However, the reduced rate or zero rate may apply when solar panels are supplied and installed as part of a supply and install contract.

Is the VAT rate down to zero for solar products?

The government announced cutting VAT from five percent to zero upon installing energy-efficient systems such as solar panels, heating pumps from April 2022. I wonder if the vat rate is down to zero for solar products as well?

many thanks. Hi. The Zero rating for energy saving materials involves the supply/installation of energy saving goods.

Can VAT be reduced on solar panels?

For example, Austria just recently reduced VAT to 0% on residential solar panel installations in January 2024. According to the latest data from Microgeneration Certification Scheme (MCS), over 1.4 million solar panel systems have been installed across the UK, up from 1.2 million in 2022.

How much does a 0% VAT Solar System cost?

The 0% VAT rate has made solar panels slightly cheaper, but not by much. For example, under the old 5%–20% VAT rate, a 3.5 kilowatt peak (kWp) solar PV system (suitable for a three-bedroom house) would cost around £7,860 in 2022. Under the current rate of VAT, that same system would cost around £7,026.

Are solar thermal and PV systems subject to VAT?

Solar thermal and PV systems are included on the list of ESMs. Their supply and installation are now subject to 0% VAT in Great Britain. In Northern Ireland, the previous rules remain in force. This means that solar is subject to 20% VAT unless a reduced rate of 5% applies.

What is the VAT rate for photovoltaic panels
