Who is the best investor in photovoltaic brackets Zhihu

Overview

What will China's solar photovoltaic market be like in 5 years?

China's solar photovoltaic market is likely to be the most critical battlefield for the state-owned power developers in the coming five years.

Is solar power a big investment in China?

Since 2018, solar has been more dominant in China's power investment, as incremental capacity statistics indicate: 2020H1: China added 11.52GW new solar capacity (7.08GW mounted and 4.43 distributed); while the nation only installed 6.82GW additional wind units. Solar is almost double the size of incremental wind.

Is SPIC a top 10 solar developer in China?

The move would allow it to rank among in China's top-10 solar developers. SPIC has been the global No.1 solar developer, currently with 19.29GW solar installed capacity. But its appetite for wind and solar remain huge, eyeing on building up 270GW renewable portfolio by 2035.

Are China's Tier-1 power companies focusing on solar?

We have observed since this year that the tier-1 power companies in China are showing stronger appetites for PV project investments—if not completely shifting the focus of their renewable investment strategies from wind to solar. Solar used to play a secondary role in state-owned power utilities' energy transition games.

Will state-owned investment reshape the solar market?

A stronger role of state-owned investment will reshape the solar market: China's state-owned power utilities (both tier-1 and 2) are of solid financing capability, which allows them to invest for the long run. As a result, mounted large-scale solar base development would roll over again.

Who is the biggest consumer of Chinese photovoltaic products?

European demand remained the strongest, making it the biggest consumer of Chinese photovoltaic products, accounting for some 40% of total exports. Contact reporter Lu Yutong (yutonglu@caixin.com) and editor Gavin Cross (gavincross@caixin.com)
