Who should I ask for a better quote for installing photovoltaic panels

Overview

Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

The best way to make sure you're getting the best deal on your solar panels is to get multiple quotes and ask as many questions of your potential installers as you need.

So how do you choose a qualified, certified, and experienced professional solar installer who uses high-quality solar panels?

The quick answer is by researching and interviewing multiple installers. What questions should you ask a solar panel salesman?

Here are some of the most important questions to ask when considering solar energy installation. Before you purchase a solar panel, you will most probably engage with a solar panel salesperson. These are the top questions to ask a solar salesman. 1. How Does The Solar Panel System Work?

.

What questions should you ask a solar installer?

A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed. In fact, ask a lot of questions, including: What modules do they use and why?

.

Should I talk to a solar installer?

“It's important you talk to an expert, and that you understand that this is essentially an open heart surgery for your house,” said John Wagner, head of sales at Custom Solar Solutions, an installer based in Atlanta. Ultimately, you'll have questions unique to your property and your project.

How do I choose a solar installer?

Credibility and Expertise – Seek out installers who have experience installing solar equipment and are knowledgeable about all aspects of the process. A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed.

How do you know if a solar installer is a good company?

If your installer has a referral program, then that is a strong sign they are used to delivering good customer experiences. As the best advocates for any company are its customers, many solar companies will compensate those who refer new business in bill credits or cold hard cash. 11. Can you break down the total costs of my system?

.

Should you go solar if your home is not suitable for solar?

If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program. By going solar, you can play an active role in achieving the nation's goal of a carbon-free electricity sector by 2035. For more information, visit the Homeowner's Guide to Going Solar.
