If your solar panels are causing your roof to leak, call a professional as soon as possible.

What if There is a Leak

Identify the Leak: First, confirm that the leak is indeed caused by the solar panel installation. Contact the Installation Company: Reach out to the company that installed your solar panels. Temporary Measures: While waiting for professional help, take temporary measures to mitigate damage.

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

Is it the solar panels that are leaking?

If solar panels are not ideally suited for your roof, poor installation tactics can make your roof leak. Roofs made from wood shingles, clay, slate, and terracotta tiles are particularly vulnerable to leaks and damage during installation.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

How do I know if my solar panels are leaking?

Pooling water on the roof or around the solar panels clearly indicates a roof leak. If you observe standing water after rainfall, it's crucial to investigate further and identify the source of the leak. 4. Decreased Energy Production or System Performance A roof leak can also impact the performance of your solar panel system.

How do I prevent a roof leak under solar panels?

Proper installation techniques and regular maintenance are essential to prevent roof leaks under solar panels. Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production.

What should I do if my solar panel is leaking?

Regularly clean the panels and surrounding roof areas to prevent buildup of dust, leaves, and other debris that can cause damage. Inspect and reinforce roof flashings and seals to prevent leaks and water damage, especially in areas surrounding the solar panel mounts.

Who should I contact if the photovoltaic panels cause the roof to leak

Do Solar Panels Cause Roof Leaks? The Truth & How ...

One common question among homeowners in Southern California considering solar panels is whether the installation process can lead to roof leaks. A well-executed solar installation should not compromise the ...
