Comtec Power

What Comtec Power can provide in addition to the full range of SE products and solutions: Power supply and backup Scaling, servicing, and maintaining UPS systems are all key considerations to ensure maximum power availability and business uptime. We also offer utility connection and supply services simplifying your supplier management.

Case Studies

The company approached Comtec seeking a more robust and competitive solution to ensuring business continuity (BC) and disaster recovery (DR) in the event of a major disruption. Comtec proposed a hybrid (on-site and cloud) based solution using Datto technology.

Modular & Containerised Datacentres

Selecting the right modular building blocks for your datacentre is crucial for success; that's where Comtec Power can help. Our expertise in datacentre consultancy, together with our experience in design and build, can be depended upon to help you find the right modular solution to meet your requirements. From small server rooms and network

Design & Build Consultancy

Comtec Power can produce full CAD designs and layouts for incorporation into the architectural or main contractor drawing packages. Our designs are converted into full specification and/or tender documentation for issue to the various sub-contractors either directly by Comtec Power or through a main contractor. Our activities extend to
