Zhongtian Technology Solar Photovoltaic Power Generation

Overview

Who supported the project PV-Tera – reliable and cost efficient photovoltaic power generation?

This work was supported by the Bavarian State Government (project “PV-Tera – Reliable and cost efficient photovoltaic power generation on the terawatt scale,” no. 44-6521a/20/5).

Does the availability of raw materials limit the growth of solar PV?

For instance, Creutzig et al. 12 found that implementing this strategy in REMIND, a specific IAM, resulted in solar PV covering 30%–50% of global electricity demand in 2050 (compared with 5%–17% share in previous results 68). The availability of raw materials is not a real issue that limits the growth of PV manufacturing.

Are silicon solar cells a constraint for thin-film technology?

Materials availability could be a constraint for thin-film technology 69,70 but not for silicon solar cells, which account for 95% of the market today. 71 Silicon is one of the most abundant materials on Earth. In 2019, the PV industry consumed 10% of global silver demand 72 which is used to manufacture the cell contacts.
